DATA Act

Different Definitions Affect Reporting

Fraud Reduction and Data Analytics Act

What are the requirements of the Fraud Reduction and Data Analytics Act of 2015?

	The Office of Management and Budget (OMB) must establish guidelines that incorporate leading practices from GAO's Fraud Risk Management Framework.
	Agencies are required to establish financial and administrative controls, to include, among other things, evaluating fraud risks, designing and implementing related antifraud controls, and using data to monitor fraud trends.
	OMB must establish a working group to improve the sharing of controls and other best practices for addressing fraud and development of data-analytics techniques.
	The working group must submit a plan to the Congress for establishing a federal interagency library of data analytics and data sets that can be used to address fraud.
	Federal agencies must report to the Congress for 3 years, as part of their annual financial reporting, on their progress in implementing OMB's guidelines and other antifraud guidance, identifying fraud risks, and establishing steps to reduce fraud.

GAO Fraud Risk Management Framework

It includes leading practices in four components:

Commit to combating fraud by creating an organizational structure and culture conducive to fraud risk management.

Assess fraud risks and document the assessment in a fraud risk profile.

Evaluate outcomes and **adapt** fraud risk management activities for continuous improvement.

Design and Implement a strategy with control activities to mitigate fraud risks.

The Framework emphasizes using a risk-based approach and focusing on fraud prevention. The practices may be tailored to a program's operations, environmental factors, and risks.
