Introduction

The General Accounting Office (GAO) is a nonpartisan agency within the legislative branch of the federal government. It evaluates federal programs, offers legal opinions, and provides Congress and the public with accurate analysis and objective recommendations on how to improve the effectiveness and efficiency of the government. GAO offers a range of products to communicate the results of its work. These products are widely disseminated to a highly diverse audience. To facilitate retrieval of these documents, summaries are entered into a searchable database. Customized database searches are available and may be requested by calling the GAO Document Distribution Center at 202-512-6000.

Alphabetical Thesaurus of Subject Terms

This fourth edition of the GAO Thesaurus lists more than 2500 terms which are used to index GAO documents and to retrieve information from the GAO documents database. The thesaurus is divided into two parts: an alphabetical thesaurus of subject terms and a keyword out of context (KWOC) index.

The alphabetical listing includes five types of cross references:

- USE Use the preferred term which is a preferred synonym, near-synonym, or word-form variant.
- UF Used for. The indicated term is a nonpreferred synonym, near-synonym, or word-form variant.
- BT Broader term
- NT Narrower term
- RT Related term

Scope notes (SN) are included for terms that might otherwise be misunderstood or misinterpreted.

KWOC (Key Word Out of Context)

The KWOC index includes all significant words in all preferred terms consisting of more than one significant word such as "Contract costs" will be listed under both "Contract" and "Costs." Terms containing the same significant word may or may not be related hierarchically. Nonpreferred terms, common articles, prepositions, etc. are excluded from the KWOC list.

**Comments and
Suggestions**

The GAO Thesaurus is updated periodically to include new terms and other changes. Please direct comments and suggestions to:
